

Myron E - Diffuser

In spaces like recording control rooms, sound mastering rooms or other high fidelity listening environments where the sound quality is critical, controlling the bandwidth of diffusion is a priority. Myron E Diffuser was conceived and developed by Artnovion with a specific technical advantage, which allows it to perform way beyond what most of other sound diffusing products are able to deliver. This EPS panel is available in 3 different colours, and is especially easy to install.

Features

Type:

- Omnidirectional primitive root diffuser
- Optimized primitive root reflection phase grating.
- 100 phase Block heights

Scattering range:
630 Hz to 6300 Hz

Purpose

- Enlarging sweet spot
- Specular reflection control
- Flutter echo control

Recommended for

- Control room
- Recording room
- Home studio
- Broadcast studio
- Drum room

Performance

This product is available in the following Fire Rate:
FG | Furniture Grade

PRODUCT COMPOSITION:

Myron E - Diffuser | EPS
- EPS

Myron E - Diffuser | 100% Recycled EPS
- 100% Recycled EPS

Dimensions
Myron E | 595x595x150mm

Why use diffusion?

Diffuser panels scattering incoming sound waves into smaller, lower energy waves, scattered over a large area. These scattered reflections create a homogeneous sound field distribution and a full, balanced acoustic response. This improves speech intelligibility, music quality, and creates a more uniform, larger sweet spot.
