

Mobile phone transceiver

BE1433

Connects Visit to your mobile phone, tablet or smartwatch.

The Mobile phone transceiver makes it easier than ever to keep tabs on your home. It connects the Visit system to your mobile phone, tablet, or smartwatch via Bluetooth. Once you have installed the Visit app, you will start to receive Visit notifications on your mobile device. In addition, your Visit receiver will alert you to incoming calls and messages on your mobile device.

It complements your existing receiver by providing additional information on your alerts, allowing you to customize your notifications, browse the notifications history and get an overview of your connected devices.

The Mobile phone transceiver can also alert to your landline telephone and has a trigger port that can be used for a contact mat, doorbell, or magnetic switch accessory.

Features

Bluetooth powered

Up to 250 m coverage, open field

App controlled

Available for iOS & Android

Sends Visit alerts to mobile devices

Displays Visit alerts on your phone, tablet or smartwatch

Alerts for mobile calls and messages

Signals your Visit receiver when you get incoming calls or messages
