

# K Frame Fixing System

Designed to boost performance and streamline installation, K Frame is an accessory for Siena K Absorber.

This Modular frame greatly speeds up the installation process, with a simple clip-in joinery system, that provides a stable base to screw Siena K. The frame also comes with an additional acoustic core that boosts mid-low frequency absorption to create an exceptional broadband acoustic absorber.

Designed for both Siena K 24 and 27 sizes, K frame also comes in two different widths, for single or double panel installation. Available in a matte black finish.

## Product Composition

K Frame (FG)  
- HMDF Structural Frame  
- Acoustic Foam

K Frame (FR)  
- HMDF Structural Frame  
- Sound PET acoustic core - Euro Class B
